ANTIG WINS RED HERRING ASIA TOP 100 AWARD

Innovative fuel cell solution to drive forward the IT industry

[Taipei, Taiwan - Aug 22, 2006] Antig Technology (www.antig.com), a leading provider of fuel cell solution, today announced it has been selected as a winner of the 2006 Red Herring Asia Top 100 award. The award program, which received over 600 entries across Asia for consideration, recognizes companies that are impacting the market through their innovation, technology, strategy, and leadership. Red Herring judges selected Antig Technology after a thorough evaluation of its business model, management, key alliances, customers, products and services.

"To be one of the distinguished companies chosen by the Red Herring editorial staff for this exclusive award is a great honor and validation for Antig's leadership position in fuel cell solution" said Bill Chen, President of Antig Technology. "This award acknowledges our innovation in technology and sound business strategy for growth"

In the later half of the 2006, Antig will showcase further fuel cell solutions and application reference designs at "IFA 2006" in Berlin, Germany and "Intel Developer Forum 2006" in San Francisco, USA.

About Antig Technology
